Create Library Assets with Juicer3

- **Camtasia Studio 8.4 only works with certain Digital Juice media files.** This includes: Animated backgrounds, stock images, music tracks, and sound effects.
- Digital Juice media assets that contain <u>alpha channel properties are not supported</u> in Camtasia Studio 8.4.

To use Digital Juice's animated Background media assets in Camtasia Studio 8.4, you must first convert them using Digital Juice's Juicer3.

Use Digital Juice's Animated Backgrounds in Camtasia Studio 8.4

To use Digital Juice content in a Camtasia Studio 8.4 video project, you must:

- 1. Purchase media content from Digital Juice. Content comes on DVD disks.
- 2. **Download** and install the latest version of Juicer3.
- 3. Load the media content into Juicer3.
- 4. Convert the Animated Background content with settings optimized for Camtasia Studio 84.
- 5. Import the converted Animated Background media content into Camtasia Studio's Clip Bin or Library.
- 6. Drag media to timeline to include in final video.
- 7. Produce video project as a shareable video file.

The scope of this documentation will cover steps 3 – 5 above.

- For information on downloading and installing Juicer3, see the <u>Digital Juice website</u>.
- For information on creating a video project, working with the timeline, or producing to a shareable video, see the Camtasia Studio online help within Camtasia Studio 8.4

Access the Animated Backgrounds

1. When you first run the Juicer, the **My Product** panel lists the Digital Juice's product categories that have been installed. Click the arrows to expand the main categories.

2. Continue to drill down in the categories until you come to the installed products. The installed products appear with a blue dot next to the title.

- 3. Click on the desired project. The SD and HD options appear.
 - If you will be converting an animated Background to Standard dimensions that use a 4:3 aspect ratio such as 800x600 or 640x480, click the SD option.
 - If you will be converting an animated Background to Widescreen dimensions that use a 16:9 aspect ratio such as 640x360 or 800x450, click the HD option.
- 4. Once the aspect ratio is selected, the specific media category folders appear in the Browser Panel.

5. Double-click the **Backgrounds** folder to open it. The media in that folder appears in the *Browser Panel*.

- 6. Click on a Background thumbnail to preview the animation.
- 7. To move back to the folder view, click the **Back** button at the top of the screen.

Continue with Select the Animated Background to Convert to Camtasia Studio 8.4 Format.

Select the Animated Background to Convert to Camtasia Studio 8.4 Format

- 1. The Backgrounds that you want to convert to CS8 format must be added to the *Batch Panel*. You can add an entire folder or individual files to the *Batch Panel*.
- 2. Grab a folder or file from the Browser Panel and drag it onto the Batch Panel.

Continue with Choose the Background's Camtasia Studio 8.4 Settings.
