All other marks are the property of their respective owners.

Introduction

This guide provides a brief overview on how to edit your Snagit video captures in Camtasia Studio 8.0. In this guide you will learn how to:

- ▶ Import your video capture into Camtasia Studio 8.0.
- ▶ Trim and cut out the unwanted portions of your video capture.
- ▶ Apply annotations and effects similar to those offered in Snagit on Windows 11.1 for image captures.
- ▶ Share your video capture.

For more in-depth help, see the Camtasia Studio help file and online tutorials.

Import a Video Capture into Camtasia Studio

The Camtasia Studio Output imports the selected capture into the Clip Bin in a project.

1. Click to select a video capture from the Open Captures Tray.
2. On the Share tab, click the Camtasia Studio Output button. You must have Camtasia Studio 7.0 or later installed for the Output button to appear.

Snagit imports the video capture into the Clip Bin in a project. Drag the video clip onto the timeline to include it in the video.

Cut Out Unwanted Portions

Cut unwanted portions such as long pauses, mistakes, etc. A cut removes a selection from the timeline and puts it on the clipboard.

1. Drag the playhead's In point (green) and Out point (red) along the timeline to make a selection. The selected area is highlighted in blue.
2. Lock any tracks on the timeline that contain clips or elements you do not want to cut.
3. Click the Cut button .

Add a Callout

Add a callout to draw viewers' attention to important action on the screen.

1. In Camtasia Studio Editor, click the Callouts tab. The Callouts task page appears.
2. Position the playhead on the timeline where the callout appears.
3. Click the Add Callout button.
4. Select a callout shape from the dropdown gallery. The callout appears on the canvas.
5. Use the dropdown menus to select other style settings such as the border, fill, and effects.
6. If desired, enter text into the text box. The text updates in callout displayed on the canvas.
7. Drag the callout to the desired location on the canvas.
8. Grab a handle to adjust the size.

Blur a Portion

Add blur callouts to maintain privacy while showing an actual process, screen, or issue. The blur callout hides portions of the video containing confidential or sensitive content, such as:

- ▶ Email address
- ▶ Login information
- ▶ Phone numbers
- ▶ Personal information
- ▶ Credit card numbers

1. In Camtasia Studio Editor, click the Callouts tab. The Callouts task page appears.
2. Position the playhead on the timeline where the callout should appear.
3. Click the Add Callout button.
4. Select the blur callout from the dropdown gallery. The callout appears on the canvas.

5. Adjust the properties to customize the blur effect.
6. Drag the callout to the desired location on the canvas.
7. Grab a handle on the canvas to adjust the size of the blur.

Enhance the Video Capture

This section describes how to add annotations and effects similar to those offered for image captures in Snagit.

Highlight an Area in the Video Capture

Add a highlight to bring attention to an area in your video capture.

1. In Camtasia Studio Editor, click the Callouts tab. The Callouts task page appears.
2. Position the playhead on the timeline where you want the highlight to begin.
3. Click the Add Callout button.
4. Select the Highlight Rectangle callout from the dropdown gallery. The callout appears on the canvas.
5. Drag the callout on the canvas to position the highlight.
6. Grab a handle to adjust the size.
7. To change the color of the highlight, click the Fill button.
8. To include a fade in or out effect, use the slider to set the duration of the fades.

Share the Edited Video Capture

Camtasia Studio offers several options to share your video with your intended audience. Click Produce and Share option above the Clip Bin to open the Production Wizard. To learn more about the sharing options, see the Camtasia Studio in-product help file.

- ▶ **Share to Screencast.com:** Upload your video directly to Screencast.com. Screencast.com is a media hosting site from TechSmith that allows you to maintain privacy control over your video, create a URL to share with your audience, create an embed code for embedding the video into a blog or web-page, and enable commenting on your video.
- ▶ **Share to YouTube:** Upload your video directly to YouTube. Camtasia Studio automatically selects the appropriate dimensions and settings for the YouTube output.
- ▶ Camtasia Studio 8 offers a number of other production formats. See the Camtasia Studio help file or tutorials for more information.
